***EN_* ADVICE**
It is not necessary but we would advise: For additional strength, you can also use some glue or tapes between the polycarbonate panel and the aluminum frame to enhance the stability.
Note: Silicone sealant and glue gun are not included in our tool kit. You can buy them locally. Only use silicone sealant suitable for aluminum.

***FR_* CONSEIL**
Ce n'est pas obligatoire, mais on te conseille : pour plus de solidité, tu peux aussi utiliser de la colle ou du ruban adhésif entre le panneau en polycarbonate et le cadre en aluminium afin d'améliorer la stabilité.
Remarque : le mastic silicone et le pistolet à colle ne sont pas inclus dans notre kit d'outils. Tu peux les acheter sur place. N'utilise que du mastic silicone adapté à l'aluminium.

***DE_* TIPP**
Es ist nicht unbedingt notwendig, aber wir empfehlen Folgendes: Für zusätzliche Festigkeit kannst du auch etwas Kleber oder Klebeband zwischen der Polycarbonat-Platte und dem Aluminiumrahmen verwenden, um die Stabilität zu erhöhen.
Hinweis: Silikondichtmasse und Heißklebepistole sind nicht in unserem Werkzeugset enthalten. Du kannst sie vor Ort kaufen. Verwende ausschließlich Silikondichtmasse, die für Aluminium geeignet ist.

***ES_* CONSEJO**
No es necesario, pero te recomendamos lo siguiente: para mayor resistencia, también puedes usar un poco de pegamento o cinta adhesiva entre el panel de policarbonato y el marco de aluminio para mejorar la estabilidad.
Nota: El sellador de silicona y la pistola de pegamento no están incluidos en nuestro kit de herramientas. Puedes comprarlos en tu zona. Usa solo sellador de silicona apto para aluminio.

***PT_* CONSELHO**
Não é obrigatório, mas aconselhamos o seguinte: para maior resistência, também podes usar um pouco de cola ou fita adesiva entre o painel de policarbonato e a moldura de alumínio, para aumentar a estabilidade.
Nota: O selante de silicone e a pistola de cola não estão incluídos no nosso kit de ferramentas. Podes comprá-los na tua zona. Usa apenas selante de silicone adequado para alumínio.

***IT_* CONSIGLIO**
Non è necessario, ma ti consigliamo quanto segue: per una maggiore resistenza, puoi anche usare un po' di colla o del nastro adesivo tra il pannello in policarbonato e il telaio in alluminio, in modo da migliorare la stabilità.
Nota: il sigillante siliconico e la pistola per colla non sono inclusi nel nostro kit di attrezzi. Puoi acquistarli in negozio. Usa solo sigillante siliconico adatto all'alluminio.

***RO_* SFAT**
Nu este obligatoriu, dar vă recomandăm următoarele: Pentru o rezistență suplimentară, puteți folosi și puțin adeziv sau bandă adezivă între panoul din policarbonat și cadrul din aluminiu, pentru a spori stabilitatea.
Notă: Etanșantul siliconic și pistolul de lipit nu sunt incluse în trusa noastră de scule. Le puteți achiziționa de la magazinele locale. Folosiți numai etanșant siliconic adecvat pentru aluminiu.

***EN_* It is not necessary but we would advise:**
For additional strength, especially in the area with the strong wind weather, you can also drill the screws between the polycarbonate and the aluminum frame to enhance the stability.
Note: The screws are included in our tool kit.

***FR_* Ce n'est pas obligatoire, mais on te conseille :**
Pour plus de solidité, surtout dans les régions où il y a beaucoup de vent, tu peux aussi visser des vis entre le polycarbonate et le cadre en aluminium pour renforcer la stabilité.
Remarque : les vis sont fournies dans notre kit d'outils.

***DE_* Es ist nicht unbedingt nötig, aber wir würden es empfehlen:**
Für zusätzliche Festigkeit, vor allem in Gegenden mit starkem Wind, kannst du die Schrauben auch zwischen dem Polycarbonat und dem Aluminiumrahmen eindrehen, um die Stabilität zu erhöhen.
Hinweis: Die Schrauben sind in unserem Werkzeugset enthalten.

***ES_* No es necesario, pero te recomendamos lo siguiente:**
Para mayor resistencia, sobre todo en zonas con mucho viento, también puedes atornillar entre el policarbonato y el marco de aluminio para mejorar la estabilidad.
Nota: Los tornillos vienen incluidos en nuestro kit de herramientas.

***PT_* Não é necessário, mas aconselhamos o seguinte:**
Para maior resistência, especialmente em zonas com ventos fortes, também podes aparafusar entre o policarbonato e a estrutura de alumínio para aumentar a estabilidade.
Nota: Os parafusos estão incluídos no nosso kit de ferramentas.

***IT_* Non è necessario, ma ti consigliamo di:**
Per una maggiore resistenza, soprattutto nelle zone soggette a forte vento, puoi anche avvitare le viti tra il policarbonato e il telaio in alluminio per migliorare la stabilità.
Nota: le viti sono incluse nel nostro kit di attrezzi.

***RO_* Nu este obligatoriu, dar vă recomandăm următoarele:**
Pentru o rezistență suplimentară, în special în zonele cu vânt puternic, puteți fixa șuruburi între policarbonat și cadrul din aluminiu, pentru a spori stabilitatea.
Notă: Șuruburile sunt incluse în trusa noastră de scule.
