M4\*18  
+1(spare)**K** x 6  
+1(spare)**L** x 8**M** x 2**N** x 1**O** x 1**P** x 1

## STEP 1: Measure opening width

1. Determine the installation contact surface: the width should be greater than 6cm.
2. Determine installation height: The height must be higher than 135cm before installation.
3. Determine the installation width: not less than 81cm, and if it is greater than 87cm additional extension pieces need to be added.

According to the opening size you measured, select the extension you need. See the step 2 section before assembling

## STEP 2: Select extension (Width Options)

Note: The larger the number of extensions and the wider the expansion, the overall stability strength of the guardrail will

### STEP 3: Assemble Extensions

Install accessories A, B.

NEVER install all extensions on the same side of the gate)

### STEP 4: Reinforced Slots

Note: The more extensions, the lower the stability of the product. For your safety, please use the reinforced slot (M).

PS. If installing with a width between 81~87cm, please skip step 3 and 4.

## STEP 5: Assemble kick plate

## STEP 6: Choose the installation method

Depending on the use scenario and needs, different installation options are available:

- A. Pressure-mounted installation (for areas with low safety hazard potential) STEP 7 to 9 & STEP 12.
- B. Hardware-mounted (screws) installation (for stairs or areas with high safety hazard potential) STEP 7 to 12.

### STEP 7: Assembled Bolts and Square tube

## Upper Bolts

Install accessories C,D,E,F,(H),L

Stick the stickers (H) onto the upper wall cups (F).

P.S. Hardware-mounted installation doesn't require stickers(H)

## Lower Bolts

Install accessories C、D、E、G、(H)、L

Stick the stickers (H) onto the lower wall cups (G).

PS. Hardware-mounted installation doesn't require stickers(H).

## STEP 8: Insert the bolts

### 8.1 Insert Upper Bolts

### 8.2 Insert Lower Bolts

P.S. For hardware-mounted installation, skip step B

It is normal for the bolts be loose, as the holes are not threaded

## STEP 9: Tighten the bolts

### 9.1 Tighten Lower Bolts

Pull out the bolts on both sides at equal distances, make sure the left and right gaps between the product and the wall are consistent, and the product still is completely upright (not skewed).

Note: Adjust the lower bolts firstly, then the upper

### 9.2 Tighten Upper Bolts

**!** When installing the wall cups, ensure the lines of the two holes are parallel to the horizon.

P.S. Pressure-mounted installation continue with STEP 9.3, 9.4 and STEP 12, and see STEP 10 to step 12 for Hardware-mounted installation.

9.3 Cut off the strap and remove the foam pearl cotton from the locking head.

9.4 Continue turning the bolt with the wrench (L). First tighten the lower bolt until it stops moving, then tighten the upper bolt until the side indicator on the lock changes from green to red.

## STEP 10: Mounted the wall cups

## 10.1 Mark the positions

## 10.2 Drill mounting holes

**x2**

## STEP 11: Insert and tighten the bolts

### 11.1 Upper Bolts

Pull out the bolts on both sides at equal distances, make sure the left and right gaps between the product and the wall are consistent, and the product still is completely upright (not skewed).

**⚠ Note:** Adjust the lower bolts, firstly, then the upper.

### 11.2 Lower Bolts

**11.3 Cut off the strap and remove the foam pearl cotton from the locking head.**

**11.4 Continue turning the bolt with the wrench (L). First tighten the lower bolt until it stops moving, then tighten the upper bolt until the side indicator on the lock changes from green to red.**

## STEP 12: Adjust the spacing between the square tubes to complete the installation

P.S. To prevent pets from passing through narrow gaps, the spacing between the square tubes must be adjusted.

### 12.1 Adjust the upper spacing

Rotate the nuts on both sides to adjust the square tubes. Ensure the gaps between the square tubes and the wall, as well as between the square tubes and the product tubes, are 1.38 inches.

### 12.2 Adjust the lower spacing

## OPERATION

### 1. Lock & Unlock

Pull back the button and lift up to open the door.

Close the door manually .

### 2. Greater than 90° keep opening

### 3. CLEANING AND MAINTENANCE

- Simply use a soft damp cloth to wipe the product, and dry it after cleaning.
- Do not use chemical or abrasive cleaners.
- Do not use if any part is **BROKEN, TORN, OR MISSING**.

## ERROR SITUATION

Examples 1: Increased Tripping Hazard. Pets could escape from the bottom.

Curved baseboards are not compatible.

Baseboards with complex, intricate profiles and little contact areas are not compatible.

Examples 2: Product tilt.

**A** x 1

**B1** x 1

**P** x 1

## ÉTAPE 1 : Mesurer la largeur de l'ouverture

1. Déterminez la surface de contact pour l'installation : la largeur doit être supérieure à 6 cm.
2. Déterminez la hauteur d'installation : celle-ci doit être supérieure à 135 cm avant l'installation.
3. Déterminez la largeur d'installation : celle-ci ne doit pas être inférieure à 81 cm ; si elle est supérieure à 87 cm, il faudra ajouter des rallonges supplémentaires.

En fonction des dimensions de l'ouverture que vous avez mesurées, choisissez la rallonge dont vous avez besoin. Consultez la section « Étape 2 » avant de procéder au montage.

## ÉTAPE 2 : Sélectionnez l'extension (Options de largeur)

Remarque : plus le nombre d'extensions est élevé et plus l'extension est large, plus la résistance globale de la glissière de sécurité sera

### ÉTAPE 3 : Assembler les rallonges

Installer les accessoires A et B.

N'installez JAMAIS toutes les rallonges du même côté du portail)

### ÉTAPE 4 : Fentes renforcées

Remarque : plus il y a d'extensions, moins le produit est stable. Pour votre sécurité, veuillez utiliser la fente renforcée (M).

P.S. : Si vous effectuez l'installation avec une largeur comprise entre 81 et 87 cm, veuillez ignorer les étapes 3 et 4.

## ÉTAPE 5 : Monter la plinthe

## ÉTAPE 6 : Choisissez la méthode d'installation

En fonction du scénario d'utilisation et des besoins, différentes options d'installation sont disponibles :

A. Installation par pression (pour les zones présentant un faible risque pour la sécurité) ÉTAPES 7 à 9 et ÉTAPE 12.

B. Installation par vissage (pour les escaliers ou les zones présentant un risque élevé pour la sécurité) ÉTAPES 7 à 12.

## ÉTAPE 7 : Assemblage des boulons et du tube carré

Boulons supérieurs

Installez les accessoires C, D, E, F, (H) et L

Collez les autocollants (H) sur les supports muraux supérieurs (F).

P.S. : L'installation à l'aide de fixations ne nécessite pas d'autocollants (H).

## Vis inférieures

Installer les accessoires C, D, E, G, (H) et L

Collez les autocollants (H) sur les supports muraux inférieurs (G).

P.S. : L'installation à l'aide de fixations ne nécessite pas d'autocollants (H).

## ÉTAPE 8 : Insérez les boulons

## 8.1 Insérer les boulons supérieurs

## 8.2 Mettre en place les boulons inférieurs

P.S. Pour une installation avec fixation par vis, ignorez l'étape B

Il est normal que les vis soient desserrées, car les trous ne sont pas filetés

## ÉTAPE 9 : Serrez les boulons

## 9.1 Serrer les boulons inférieurs

Desserrez les vis des deux côtés en respectant des distances égales, assurez-vous que les espaces à gauche et à droite entre le produit et le mur sont identiques, et que le produit reste parfaitement droit (sans être de travers).

Remarque : réglez d'abord les vis du bas, puis celles du haut

## 9.2 Serrer les boulons supérieurs

**!** Lors de l'installation des supports muraux, veillez à ce que les axes des deux trous soient parallèles à l'horizontale.

P.S. Pour une installation par pression, passez aux étapes 9.3, 9.4 et 12 ; pour une installation avec fixation par vis, consultez les étapes 10 à 12.

Alignez-vous avec le sol !

9.3 Coupez la sangle et retirez la mousse perlée de la tête de verrouillage.

9.4 Continuez à tourner le boulon à l'aide de la clé (L). Serrez d'abord le boulon inférieur jusqu'à ce qu'il ne bouge plus, puis serrez le boulon supérieur jusqu'à ce que l'indicateur latéral du verrou passe du vert au rouge.

## ÉTAPE 10 : Fixation des supports muraux

## 10.1 Marquer les emplacements

## 10.2 Percer les trous de fixation

**x2**

## ÉTAPE 11 : Insérez et serrez les boulons

### 11.1 Boulons supérieurs

Desserrez les vis des deux côtés en respectant des distances égales, assurez-vous que les espaces entre le produit et le mur sont identiques à gauche et à droite, et que le produit reste parfaitement d'aplomb (sans être de travers).

**⚠ Remarque :** réglez d'abord les vis inférieures, puis les vis supérieures.

### 11.2 Vis inférieures

11.3 Coupez la sangle et retirez la mousse perlée de la tête de verrouillage.

11.4 Continuez à tourner le boulon à l'aide de la clé (L). Serrez d'abord le boulon inférieur jusqu'à ce qu'il ne bouge plus, puis serrez le boulon supérieur jusqu'à ce que l'indicateur latéral du verrou passe du vert au rouge.

## ÉTAPE 12 : Réglez l'espacement entre les tubes carrés pour terminer l'installation

P.S. : Pour empêcher les animaux domestiques de se faufiler dans les espaces étroits, l'espacement entre les tubes carrés doit être ajusté.

### 12.1 Réglez l'espacement supérieur

Tournez les écrous des deux côtés pour régler les tubes carrés. Assurez-vous que les espaces entre les tubes carrés et la paroi, ainsi qu'entre les tubes carrés et les tubes du produit, mesurent 3,5 cm.

### 12.2 Réglage de l'espacement inférieur

## FONCTIONNEMENT

### 1. Verrouiller et déverrouiller

Tirez sur le bouton et soulevez pour ouvrir la porte.

Fermez la porte manuellement.

### 2. Si l'angle est supérieur à 90°, continuer à ouvrir

### 3. NETTOYAGE ET ENTRETIEN

- Il suffit d'utiliser un chiffon doux et humide pour essuyer le produit, puis de le sécher après le nettoyage.
- N'utilisez pas de produits nettoyants chimiques ou abrasifs.
- Ne pas utiliser si une pièce est CASSÉE, DÉCHIRÉE OU MANQUANTE.

## SITUATION D'ERREUR

Exemple 1 : Risque accru de trébuchement. Les animaux domestiques pourraient s'échapper par le bas.

Les plinthes courbes ne sont pas compatibles.

Les plinthes présentant des profils complexes et détaillés et des surfaces de contact réduites ne sont pas compatibles.

Exemple 2 : inclinaison du produit.

## PASO 1: Mide el ancho de la abertura

1. Determine la superficie de contacto para la instalación: la anchura debe ser superior a 6 cm.
2. Determine la altura de instalación: antes de la instalación, la altura debe ser superior a 135 cm.
3. Determine la anchura de instalación: no debe ser inferior a 81 cm; si es superior a 87 cm, será necesario añadir piezas de extensión adicionales.

Según las medidas de la abertura que hayas tomado, selecciona la extensión que necesites. Consulta la sección del paso 2 antes de proceder al montaje.

## PASO 2: Selecciona la extensión (Opciones de ancho)

### PASO 3: Montar las extensiones

Instalar los accesorios A y B.

NUNCA instales todas las extensiones en el mismo lado de la puerta)

### PASO 4: Ranuras reforzadas

Nota: Cuantas más extensiones se utilicen, menor será la estabilidad del producto. Por tu seguridad, utiliza la ranura reforzada (M).

P. D.: Si la instalación se realiza con una anchura de entre 81 y 87 cm, omite los pasos 3 y 4.

## PASO 5: Montar el zócalo

## PASO 6: Elija el método de instalación

En función del uso previsto y de las necesidades, hay disponibles diferentes opciones de instalación:

A. Instalación por presión (para zonas con bajo riesgo de seguridad) PASOS 7 a 9 y PASO 12.

B. Instalación con tornillos (para escaleras o zonas con alto riesgo de seguridad) PASOS 7 a 12.

## PASO 7: Pernos y tubo cuadrado ensamblados

Pernos superiores

Instale los accesorios C, D, E, F, (H) y L

Pega las pegatinas (H) en las copas superiores de la pared (F).

P.D.: La instalación con tornillos no requiere pegatinas (H).

## Tornillos inferiores

Instalar los accesorios C, D, E, G, (H) y L

Pega las pegatinas (H) en las copas inferiores de la pared (G).

P. D.: La instalación con tornillos no requiere pegatinas (H).

## PASO 8: Inserta los tornillos

### 8.1 Colocar los pernos superiores

### 8.2 Colocar los pernos inferiores

P.D.: Para la instalación con fijación mecánica, omite el paso B

Es normal que los tornillos estén flojos, ya que los orificios no tienen rosca

## PASO 9: Aprieta los tornillos

### 9.1 Apriete los tornillos inferiores

Afloje los tornillos de ambos lados a la misma distancia, asegúrese de que los espacios a la izquierda y a la derecha entre el producto y la pared sean uniformes, y de que el producto siga estando completamente recto (sin inclinarse).

Nota: Ajuste primero los tornillos inferiores, luego los superiores

### 9.2 Apriete los pernos superiores

! Al instalar los soportes de pared, asegúrese de que las líneas de los dos orificios estén paralelas al horizonte.

P.D.: Para la instalación con fijación a presión, continúe con los PASOS 9.3, 9.4 y 12; para la instalación con fijación mediante tornillería, consulte los PASOS 10 a 12.

¡Alinea con el suelo!

9.3 Corta la correa y retira la espuma de algodón de la cabeza de cierre.

9.4 Siga girando el perno con la llave (L). Primero apriete el perno inferior hasta que deje de moverse y, a continuación, apriete el perno superior hasta que el indicador lateral del cierre cambie de verde a rojo.

## PASO 10: Instalación de los soportes de pared

### 10.1 Marcar las posiciones

### 10.2 Taladrar los orificios de fijación

## PASO 11: Inserta y aprieta los tornillos

### 11.1 Tornillos superiores

Afloje los tornillos de ambos lados a la misma distancia, asegúrese de que los espacios a la izquierda y a la derecha entre el producto y la pared sean uniformes, y de que el producto siga estando completamente recto (sin inclinarse).

**Nota:** Ajuste primero los tornillos inferiores y, a continuación, los superiores.

### 11.2 Tornillos inferiores

11.3 Corta la correa y retira la espuma de algodón de la cabeza de cierre.

11.4 Siga girando el perno con la llave (L). Primero apriete el perno inferior hasta que deje de moverse y, a continuación, apriete el perno superior hasta que el indicador lateral del cierre cambie de verde a rojo.

PASO 12: Ajusta la distancia entre los tubos cuadrados para completar la instalación

P.D.: Para evitar que las mascotas se cuelen por los huecos estrechos, hay que ajustar la distancia entre los tubos cuadrados.

### 12.1 Ajusta la distancia superior

Gire las tuercas de ambos lados para ajustar los tubos cuadrados. Asegúrese de que los espacios entre los tubos cuadrados y la pared, así como entre los tubos cuadrados y los tubos del producto, sean de 3,5 cm.

### 12.2 Ajuste la separación inferior

## FUNCIONAMIENTO

### 1. Bloquear y desbloquear

Tira del botón hacia atrás y levanta para abrir la puerta.

Cierra la puerta manualmente.

### 2. Si el ángulo es superior a 90°, mantén la puerta abierta

### 3. LIMPIEZA Y MANTENIMIENTO

- Basta con limpiar el producto con un paño suave humedecido y secarlo después de la limpieza.
- No utilices productos de limpieza químicos ni abrasivos.
- No lo utilices si alguna pieza está ROTA, RASGADA O FALTA.

## SITUACIÓN DE ERROR

Ejemplo 1: Mayor riesgo de tropiezos. Las mascotas podrían escaparse por la parte inferior.

Los zócalos curvos no son compatibles.

Los zócalos con perfiles complejos y intrincados y con pocas superficies de contacto no son compatibles.

Ejemplo 2: Inclutación del producto.

**A** x 1**B1** x 1  
7cm**B2** x 1  
14cm**C** x 2**D** x 4**E** x 4**F** x 2**G** x 2**H** x 4**J** x 6  
M4\*18  
+1(spare)**K** x 6  
+1(spare)**L** x 8**M** x 2**N** x 1**O** x 1**P** x 1

## PASSO 1: Medir a largura da abertura

1. Determine a superfície de contacto para a instalação: a largura deve ser superior a 6 cm.
2. Determine a altura de instalação: a altura deve ser superior a 135 cm antes da instalação.
3. Determine a largura de instalação: não inferior a 81 cm; se for superior a 87 cm, será necessário adicionar peças de extensão.

De acordo com a medida da abertura que obteve, selecione a extensão necessária. Consulte a secção do passo 2 antes de proceder à montagem

## PASSO 2: Selecionar extensão (Opções de largura)

Nota: Quanto maior for o número de extensões e mais ampla for a expansão, maior será a resistência e a estabilidade geral do guard-rail

## PASSO 3: Montar as extensões

Instalar os acessórios A e B.

NUNCA instale todas as extensões no mesmo lado do portão)

## PASSO 4: Ranhuras reforçadas

Nota: Quanto mais extensões forem utilizadas, menor será a estabilidade do produto. Para sua segurança, utilize a ranhura reforçada (M).

P.S.: Se a instalação for feita com uma largura entre 81 e 87 cm, ignore os passos 3 e 4.

## PASSO 5: Montar o rodapé

## PASSO 6: Escolha o método de instalação

Dependendo do cenário de utilização e das necessidades, estão disponíveis diferentes opções de instalação:

A. Instalação por pressão (para áreas com baixo risco de segurança) PASSO 7 a 9 e PASSO 12.

B. Instalação com parafusos (para escadas ou áreas com elevado risco de segurança) PASSO 7 a 12.

## PASSO 7: Parafusos montados e tubo quadrado

Parafusos superiores

Instale os acessórios C, D, E, F, (H) e L

Cole os autocolantes (H) nas copas superiores da parede (F).

P.S. A instalação com parafusos não requer autocolantes (H)

## Parafusos inferiores

Instalar os acessórios C, D, E, G, (H) e L

Descascar

Gira!

Cole os autocolantes (H) nas bases inferiores (G).

P.S.: A instalação com parafusos não requer autocolantes (H).

## PASSO 8: Insira os parafusos

### 8.1 Colocar os parafusos superiores

### 8.2 Colocar os parafusos inferiores

P.S. Para instalação com fixação por parafusos, ignore o passo B

É normal que os parafusos fiquem soltos, uma vez que os orifícios não têm rosca

## PASSO 9: Aperte os parafusos

## 9.1 Aperte os parafusos inferiores

Retire os parafusos de ambos os lados a distâncias iguais, certifique-se de que as folgas à esquerda e à direita entre o produto e a parede são uniformes e de que o produto continua totalmente na vertical (sem estar inclinado).

Nota: Ajuste primeiro os parafusos inferiores e, em seguida, os superiores

## 9.2 Aperte os parafusos superiores

**!** Ao instalar os suportes de parede, certifique-se de que as linhas dos dois orifícios ficam paralelas ao horizonte.

P.S. Para a instalação com fixação por pressão, continue com os passos 9.3, 9.4 e 12; consulte os passos 10 a 12 para a instalação com fixação por parafusos.

Alinhar com o chão!

9.3 Corte a tira e retire a espuma de algodão da cabeça de bloqueio.

9.4 Continue a rodar o parafuso com a chave inglesa (L). Primeiro, aperte o parafuso inferior até que este deixe de se mover; em seguida, aperte o parafuso superior até que o indicador lateral da fechadura mude de verde para vermelho.

## PASSO 10: Montagem dos suportes de parede

## 10.1 Marcar as posições

## 10.2 Fazer os furos de montagem

## PASSO 11: Insira e aperte os parafusos

## 11.1 Parafusos superiores

Retire os parafusos de ambos os lados a distâncias iguais, certifique-se de que as folgas à esquerda e à direita entre o produto e a parede são uniformes e de que o produto continua totalmente na vertical (sem estar inclinado).

**!** Nota: Ajuste primeiro os parafusos inferiores e, em seguida, os superiores.

## 11.2 Parafusos inferiores

11.3 Corte a tira e retire a espuma de algodão da cabeça de bloqueio.

11.4 Continue a rodar o parafuso com a chave inglesa (L). Primeiro, aperte o parafuso inferior até que este deixe de se mover; em seguida, aperte o parafuso superior até que o indicador lateral da fechadura mude de verde para vermelho.

**PASSO 12: Ajuste o espaçamento entre os tubos quadrados para concluir a instalação**

P.S. Para impedir que os animais de estimação passem por aberturas estreitas, o espaçamento entre os tubos quadrados deve ser ajustado.

### 12.1 Ajuste o espaçamento superior

Gire as porcas de ambos os lados para ajustar os tubos quadrados. Certifique-se de que as distâncias entre os tubos quadrados e a parede, bem como entre os tubos quadrados e os tubos do produto, sejam de 3,5 cm.

### 12.2 Ajustar o espaçamento inferior

## FUNCIONAMENTO

## 1. Bloquear e desbloquear

Puxe o botão para trás e levante para abrir a porta.

Feche a porta manualmente.

## 2. Se for superior a 90°, mantenha a abertura

## 3. LIMPEZA E MANUTENÇÃO

- Basta utilizar um pano macio e húmido para limpar o produto e secá-lo após a limpeza.
- Não utilize produtos de limpeza químicos ou abrasivos.
- Não utilize o produto se alguma peça estiver PARTIDA, RASGADA OU EM FALTA.

## SITUAÇÃO DE ERRO

Exemplo 1: Risco acrescido de tropeçar. Os animais de estimação podem escapar pela parte inferior.

Os rodapés curvos não são compatíveis.

Os rodapés com perfis complexos e intrincados e com poucas áreas de contacto não são compatíveis.

Exemplo 2: Inclinação do produto.

## SCHRITT 1: Öffnungsbreite messen

1. Bestimmen Sie die Montagefläche: Die Breite sollte mehr als 6 cm betragen.
2. Bestimmen Sie die Montagehöhe: Die Höhe muss vor der Montage mehr als 135 cm betragen.
3. Bestimmen Sie die Montagebreite: Sie darf nicht weniger als 81 cm betragen; bei einer Breite von mehr als 87 cm müssen zusätzliche Verlängerungsstücke angebracht werden.

Wählen Sie entsprechend der von Ihnen gemessenen Öffnungsgröße die benötigte Verlängerung aus. Lesen Sie vor dem Zusammenbau den Abschnitt zu Schritt 2.

## SCHRITT 2: Erweiterung auswählen (Breitenoptionen)

Hinweis: Je größer die Anzahl der Ausleger und je breiter die Ausladung, desto höher ist die Gesamtstabilität der Leitplanke.

### SCHRITT 3: Verlängerungen montieren

Zubehöerteile A und B anbringen.

Installieren Sie NIEMALS alle Verlängerungen auf derselben Seite des Tors)

### SCHRITT 4: Verstärkte Schlitz

Hinweis: Je mehr Verlängerungsstücke verwendet werden, desto geringer ist die Stabilität des Produkts. Zu Ihrer Sicherheit verwenden Sie bitte den verstärkten Schlitz (M).

P.S.: Bei einer Breite zwischen 81 und 87 cm überspringen Sie bitte die Schritte 3 und 4.

## SCHRITT 5: Fußleiste montieren

## SCHRITT 6: Wählen Sie die Montageart

Je nach Anwendungsszenario und Anforderungen stehen verschiedene Montageoptionen zur Verfügung:

A. Druckmontage (für Bereiche mit geringem Sicherheitsrisiko) SCHRITT 7 bis 9 & SCHRITT 12.

B. Schraubmontage (für Treppen oder Bereiche mit hohem Sicherheitsrisiko) SCHRITT 7 bis 12.

## SCHRITT 7: Montierte Schrauben und Vierkantrohr

Obere Schrauben

Montieren Sie die Zubehörteile C, D, E, F, (H) und L

Kleben Sie die Aufkleber (H) auf die oberen Wandhalterungen (F).

P.S. Bei der Montage mit Befestigungsmaterial sind keine Aufkleber (H) erforderlich.

## Untere Schrauben

Zubehöerteile C, D, E, G, (H) und L montieren

Schälen

Drehen!

Kleben Sie die Aufkleber (H) auf die unteren Wandhalterungen (G).

P.S.: Bei der Montage mit Befestigungsmaterial sind keine Aufkleber (H) erforderlich.

## SCHRITT 8: Setzen Sie die Schrauben ein

## 8.1 Obere Schrauben einsetzen

## 8.2 Untere Schrauben einsetzen

P.S. Bei der Montage mit Befestigungselementen überspringen Sie Schritt B

Es ist normal, dass die Schrauben locker sitzen, da die Löcher kein Gewinde haben

## SCHRITT 9: Ziehen Sie die Schrauben fest

### 9.1 Untere Schrauben festziehen

Ziehen Sie die Schrauben auf beiden Seiten in gleichen Abständen heraus, achten Sie darauf, dass der Abstand zwischen dem Produkt und der Wand links und rechts gleichmäßig ist und das Produkt weiterhin vollkommen senkrecht steht (nicht schief).

Hinweis: Stellen Sie zuerst die unteren Schrauben ein, dann die oberen.

### 9.2 Obere Schrauben festziehen

**!** Achten Sie bei der Montage der Wandhalterungen darauf, dass die Achsen der beiden Bohrlöcher parallel zum Horizont verlaufen.

P.S. Bei der druckbeaufschlagten Montage fahren Sie mit den Schritten 9.3, 9.4 und 12 fort; Informationen zur hardwarebasierten Montage finden Sie in den Schritten 10 bis 12.

Am Boden ausrichten!

9.3 Schneiden Sie den Riemen ab und entfernen Sie die Schaumstoffpolsterung vom Verschlusskopf.

9.4 Drehen Sie die Schraube mit dem Schraubenschlüssel (L) weiter. Ziehen Sie zunächst die untere Schraube fest, bis sie sich nicht mehr bewegen lässt, und ziehen Sie dann die obere Schraube fest, bis die seitliche Anzeige am Schloss von grün auf rot wechselt.

## SCHRITT 10: Wandhalterungen montieren

### 10.1 Positionen markieren

### 10.2 Befestigungslöcher bohren

## SCHRITT 11: Schrauben einsetzen und festziehen

### 11.1 Obere Schrauben

Ziehen Sie die Schrauben auf beiden Seiten in gleichen Abständen heraus, achten Sie darauf, dass der Abstand zwischen dem Produkt und der Wand links und rechts gleichmäßig ist und das Produkt weiterhin vollkommen senkrecht steht (nicht schief).

**!** Hinweis: Stellen Sie zuerst die unteren Schrauben ein, dann die oberen.

### 11.2 Untere Schrauben

11.3 Schneiden Sie das Band ab und entfernen Sie die Schaumstoffpolsterung vom Verschlusskopf.

11.4 Drehen Sie die Schraube mit dem Schraubenschlüssel (L) weiter. Ziehen Sie zunächst die untere Schraube fest, bis sie sich nicht mehr bewegen lässt, und ziehen Sie dann die obere Schraube fest, bis die seitliche Anzeige am Schloss von grün auf rot wechselt.

**SCHRITT 12:** Passen Sie den Abstand zwischen den Vierkantrohren an, um die Montage abzuschließen

P.S. Um zu verhindern, dass Haustiere durch enge Lücken schlüpfen, muss der Abstand zwischen den Vierkantrohren angepasst werden.

### 12.1 Passen Sie den oberen Abstand an

Drehen Sie die Muttern auf beiden Seiten, um die Vierkantrohre einzustellen. Stellen Sie sicher, dass der Abstand zwischen den Vierkantrohren und der Wand sowie zwischen den Vierkantrohren und den Produktröhren 1,38 Zoll beträgt.

### 12.2 Den unteren Abstand einstellen

## BETRIEB

## 1. Sperren &amp; Entsperren

Zieh den Knopf zurück und hebe die Tür an, um sie zu öffnen.

Schließen Sie die Tür von Hand.

## 2. Bei einem Winkel von mehr als 90° weiter öffnen

## 3. REINIGUNG UND PFLEGE

- Wischen Sie das Produkt einfach mit einem weichen, feuchten Tuch ab und trocknen Sie es nach der Reinigung.
- Verwenden Sie keine chemischen oder scheuernden Reinigungsmittel.
- Verwenden Sie das Produkt nicht, wenn Teile BESCHÄDIGT, ZERRISSEN ODER FEHLEN.

## FEHLERSITUATION

Beispiel 1: Erhöhte Stolpergefahr. Haustiere könnten aus dem unteren Bereich entkommen.

Gebogene  
Sockelleisten sind  
nicht kompatibel.

Sockelleisten mit  
komplexen,  
filigranen Profilen  
und kleinen  
Auflageflächen  
sind nicht  
geeignet.

Beispiel 2: Produktneigung.

**A** x 1**B1** x 1

## FASE 1: Misurare la larghezza dell'apertura

1. Determinare la superficie di appoggio: la larghezza deve essere superiore a 6 cm.
2. Determinare l'altezza di installazione: prima dell'installazione, l'altezza deve essere superiore a 135 cm.
3. Determinare la larghezza di installazione: non inferiore a 81 cm; se è superiore a 87 cm, è necessario aggiungere dei prolungamenti.

In base alle dimensioni dell'apertura che hai misurato, scegli la prolunga che ti serve. Consulta la sezione relativa al punto 2 prima di procedere al montaggio

## FASE 2: Seleziona l'estensione (Opzioni di larghezza)

Configurazione 1

81~87cm

Configurazione 2

88~94cm

Configurazione 3

95~101cm

Configurazione 4

102~108cm

Nota: maggiore è il numero di prolungamenti e più ampia è l'estensione, maggiore sarà la resistenza complessiva del guardrail

### FASE 3: Montaggio delle prolunghe

Installare gli accessori A e B.

Non installare MAI tutte le prolunghe sullo stesso lato del cancello)

### FASE 4: Asse di rinforzo

Nota: maggiore è il numero di prolunghe, minore è la stabilità del prodotto. Per la vostra sicurezza, vi preghiamo di utilizzare l'incastro rinforzato (M).

P.S. In caso di installazione con una larghezza compresa tra 81 e 87 cm, saltare i passaggi 3 e 4.

## FASE 5: Montaggio del battiscopa

## FASE 6: Scegliere il metodo di installazione

A seconda dello scenario di utilizzo e delle esigenze, sono disponibili diverse opzioni di installazione:

- A. Installazione a pressione (per aree a basso rischio) FASI da 7 a 9 e FASE 12.
- B. Installazione con elementi di fissaggio (viti) (per scale o aree ad alto rischio) FASI da 7 a 12.

## FASE 7: Bulloni assemblati e tubo quadrato

Bulloni superiori

Installare gli accessori C, D, E, F, (H), L

Incolla gli adesivi (H) sui supporti a muro superiori (F).

P.S. L'installazione con fissaggio a vite non richiede l'uso degli adesivi (H)

## Bulloni inferiori

Montare gli accessori C, D, E, G, (H) e L

Incolla gli adesivi (H) sulle coppe inferiori (G).

P.S. L'installazione con fissaggio a vite non richiede l'uso degli adesivi (H).

## FASE 8: Inserire i bulloni

## 8.1 Inserire i bulloni superiori

## 8.2 Inserire i bulloni inferiori

P.S. Per l'installazione con fissaggio meccanico, saltare il passaggio B

È normale che i bulloni siano allentati, poiché i fori non sono filettati

## FASE 9: Serrare i bulloni

## 9.1 Serrare i bulloni inferiori

Svitare i bulloni su entrambi i lati a distanze uguali, assicurandosi che gli spazi a destra e a sinistra tra il prodotto e la parete siano uniformi e che il prodotto rimanga perfettamente in posizione verticale (non inclinato).

Nota: regolare prima i bulloni inferiori, poi quelli superiori

## 9.2 Serrare i bulloni superiori

! Durante l'installazione delle staffe a muro, assicurarsi che le linee dei due fori siano parallele all'orizzonte.

P.S. Per l'installazione con fissaggio a pressione, procedere con i PASSI 9.3, 9.4 e 12; per l'installazione con fissaggio meccanico, consultare i PASSI da 10 a 12.

9.3 Tagliare il cinturino e rimuovere l'imbottitura in poliestere espanso dalla testa di chiusura.

9.4 Continuare a ruotare il bullone con la chiave (L). Serrare prima il bullone inferiore fino a quando non si blocca, quindi serrare il bullone superiore finché l'indicatore laterale sulla serratura non passa da verde a rosso.

## FASE 10: Montaggio dei supporti a muro

### 10.1 Segnare le posizioni

### 10.2 Praticare i fori di montaggio

**x2**

## FASE 11: Inserire e serrare i bulloni

## 11.1 Bulloni superiori

Svitare i bulloni su entrambi i lati a distanze uguali, assicurandosi che gli spazi tra il prodotto e la parete a destra e a sinistra siano uniformi e che il prodotto rimanga perfettamente in posizione verticale (non inclinato).

**⚠** Nota: regolare prima i bulloni inferiori, poi quelli superiori.

## 11.2 Bulloni inferiori

11.3 Tagliare il cinturino e rimuovere l'imbottitura in poliuretano espanso dalla testa di chiusura.

11.4 Continuare a ruotare il bullone con la chiave (L). Serrare prima il bullone inferiore fino a quando non si blocca, quindi serrare il bullone superiore finché l'indicatore laterale sulla serratura non passa da verde a rosso.

## FASE 12: Regolare la distanza tra i tubi quadrati per completare l'installazione

P.S. Per impedire agli animali domestici di passare attraverso gli spazi ristretti, è necessario regolare la distanza tra i tubi quadrati.

### 12.1 Regolare la distanza nella parte superiore

Ruotare i dadi su entrambi i lati per regolare i tubi quadrati. Assicurarsi che gli spazi tra i tubi quadrati e la parete, così come tra i tubi quadrati e i tubi del prodotto, siano di 1,38 pollici.

### 12.2 Regolare la distanza inferiore

## FUNZIONAMENTO

### 1. Blocca e sblocca

Tirare indietro il pulsante e sollevare per aprire lo sportello.

Chiudere la porta manualmente.

### 2. Se l'angolo è superiore a 90°, continuare ad aprire

### 3. PULIZIA E MANUTENZIONE

- È sufficiente utilizzare un panno morbido inumidito per pulire il prodotto e asciugarlo dopo la pulizia.
- Non utilizzare detergenti chimici o abrasivi.
- Non utilizzare il prodotto se presenta parti ROTTE, STRAPPATE O MANCANTI.

## SITUAZIONE DI ERRORE

Esempio 1: Maggiore rischio di inciampare. Gli animali domestici potrebbero fuoriuscire dalla parte inferiore.

I battiscopa curvi non sono compatibili.

I battiscopa con profili complessi e intricati e con superfici di appoggio ridotte non sono compatibili.

Esempio 2: Inclinazione del prodotto.

## PASUL 1: Măsurări lăţimea deschiderii

1. Stabiliţi suprafaţa de contact pentru montare: lăţimea trebuie să fie mai mare de 6 cm.
2. Stabiliţi înălţimea de montare: înainte de montare, înălţimea trebuie să fie mai mare de 135 cm.
3. Stabiliţi lăţimea de montare: nu mai puțin de 81 cm; dacă aceasta depăşeşte 87 cm, trebuie adăugate elemente de prelungire suplimentare.

În funcţie de dimensiunea orificiului pe care aţi măsurat-o, alegeţi extensia de care aveţi nevoie. Consultaţi secţiunea „Pasul 2” înainte de asamblare

## PASUL 2: Selectaţi extensia (Opţiuni de lăţime)

## PASUL 3: Asamblarea extensiilor

Instalați accesoriile A și B.

NU instalați NICIODATĂ toate extensiile pe aceeași parte a porții)

## PASUL 4: Fantele întărite

Notă: Cu cât sunt mai multe extensii, cu atât stabilitatea produsului este mai redusă. Pentru siguranța dumneavoastră, vă rugăm să utilizați fanta consolidată (M).

P.S. Dacă montați produsul la o lățime cuprinsă între 81 și 87 cm, vă rugăm să omiteți pașii 3 și 4.

## PASUL 5: Montați placa de protecție

## PASUL 6: Alegeți metoda de instalare

În funcție de scenariul de utilizare și de necesități, sunt disponibile diferite opțiuni de instalare:

A. Instalare prin fixare sub presiune (pentru zone cu risc redus de accidentare) PASUL 7–9 și PASUL 12.

B. Instalare cu elemente de fixare (șuruburi) (pentru scări sau zone cu risc ridicat de accidentare) PASUL 7–12.

## PASUL 7: Șuruburi asamblate și țevă pătrată

Șuruburi superioare

Instalați accesoriile C, D, E, F, (H), L

Lipiți autocolantele (H) pe suporturile superioare de perete (F).

P.S. Instalarea cu elemente de fixare nu necesită autocolante (H)

## Șuruburi inferioare

Montați accesoriile C, D, E, G, (H) și L

Lipii autocolantele (H) pe suporturile inferioare de perete (G).

P.S. Instalarea cu elemente de fixare nu necesită autocolante (H).

## PASUL 8: Introduceți șuruburile

## 8.1 Introduceți șuruburile superioare

## 8.2 Introduceți șuruburile inferioare

P.S. Pentru montarea pe suport metalic, săriți peste pasul B

Este normal ca șuruburile să fie slăbite, deoarece orificiile nu sunt filetate

## PASUL 9: Strângeți șuruburile

## 9.1 Strângeți șuruburile inferioare

Scoateți șuruburile de pe ambele părți la distanțe egale, asigurați-vă că spațiile din stânga și din dreapta dintre produs și perete sunt uniforme și că produsul rămâne perfect vertical (nu este înclinat).

Notă: Reglați mai întâi șuruburile inferioare, apoi pe cele superioare

## 9.2 Strângeți șuruburile superioare

**!** Când montați suporturile de perete, asigurați-vă că axele celor două găuri sunt paralele cu orizontul.

P.S. Pentru montarea prin presare, continuați cu PAȘII 9.3, 9.4 și 12; pentru montarea cu elemente de fixare, consultați pașii 10–12.

Aliniați-vă cu podeaua!

9.3 Tăiați curea și îndepărtați vata cu perle din capul de blocare.

9.4 Continuați să rotiți șurubul cu cheia (L). Strângeți mai întâi șurubul inferior până când acesta nu se mai mișcă, apoi strângeți șurubul superior până când indicatorul lateral de pe încuietoare trece de la verde la roșu.

## PASUL 10: Montarea suporturilor de perete

## 10.1 Marcați pozițiile

## 10.2 Găuri de fixare

**x2**

## PASUL 11: Introduceți și strângeți șuruburile

## 11.1 Șuruburile superioare

Scoateți șuruburile de pe ambele părți la distanțe egale, asigurați-vă că spațiile din stânga și din dreapta dintre produs și perete sunt uniforme și că produsul rămâne perfect vertical (nu este înclinat).

**!** Notă: Reglați mai întâi șuruburile inferioare, apoi pe cele superioare.

## 11.2 Șuruburile inferioare

11.3 Tăiați cureaua și îndepărtați vata de spumă din capul de blocare.

11.4 Continuați să rotiți șurubul cu cheia (L). Strângeți mai întâi șurubul inferior până când acesta nu se mai mișcă, apoi strângeți șurubul superior până când indicatorul lateral de pe încuietoare trece de la verde la roșu.

## PASUL 12: Reglați distanța dintre tuburile pătrate pentru a finaliza instalarea

P.S. Pentru a împiedica animalele de companie să treacă prin spațiile înguste, distanța dintre tuburile pătrate trebuie reglată.

### 12.1 Reglați distanța dintre tuburile superioare

Rotiți piulițele de pe ambele părți pentru a regla tuburile pătrate. Asigurați-vă că distanțele dintre tuburile pătrate și perete, precum și dintre tuburile pătrate și tuburile produsului, sunt de 1,38 inci.

### 12.2 Reglarea distanței inferioare

## FUNCȚIONARE

### 1. Blocare și deblocare

Trageți butonul  
înapoi și ridicați  
pentru a deschide  
ușa.

Închideți ușa  
manual.

### 2. Dacă unghiul este mai mare de 90°, mențineți deschis

### 3. CURĂȚARE ȘI ÎNTREȚINERE

- Ștergeți produsul cu o cârpă moale și umedă, apoi uscați-l după curățare.
- Nu folosiți produse de curățare chimice sau abrazive.
- Nu folosiți produsul dacă vreo componentă este SPARTĂ, RUPTĂ SAU LIPSEȘTE.

## SITUAȚIE DE EROARE

Exemplu 1: Risc crescut de împiedicare. Animalele de companie ar putea ieși pe partea de jos.

Plintele curbate nu sunt compatibile.

Plintele cu profile complexe și complicate și cu suprafețe de contact reduse nu sunt compatibile.

Exemplul 2: Înclinarea produsului.
